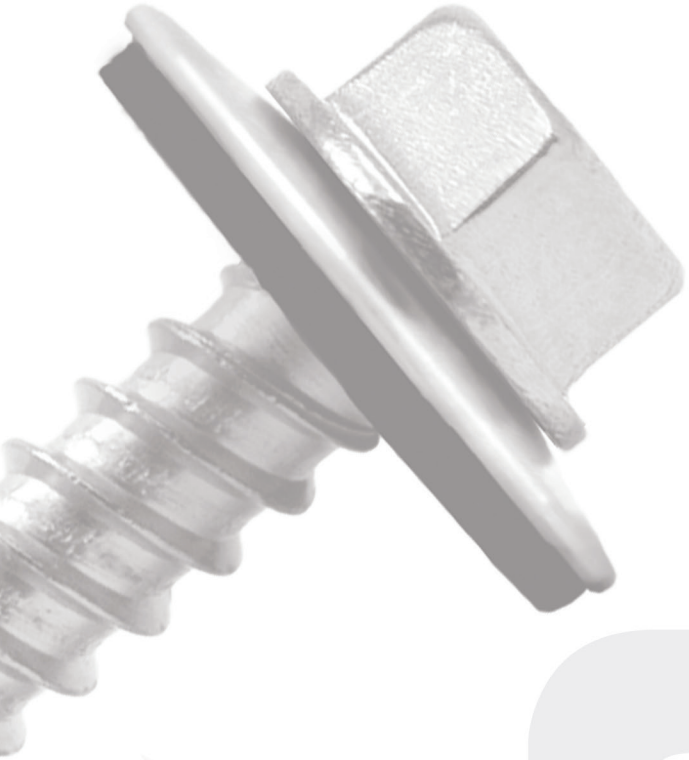
300 MASTERGRIP™ STAINLESS™



300 MASTERGRIP™ offers contractors and building roll formers an alternative solution for high wind and snow load environments. The deep major thread design for the **300 MASTERGRIP™** provided by Lakeside Construction Fasteners allows the fastener to be embedded in all substrates for maximum pull-out with resistance to Red Rust!

300 MASTERGRIP™ will secure the metal panel to the building structure to help prevent panel pullover and shear in the most extreme high wind and snow load conditions!

300 MASTERGRIP™ SYSTEM

- **Screw and Nail Replacement Solution!**
- **Engineered for High Shear Environments!**
- **300 Stainless Resistent Against Red Rust!**
- **Stainless EPDM Washer for Positive Seal!**
- **Innovative L3 Dura Protec™ Coating!**

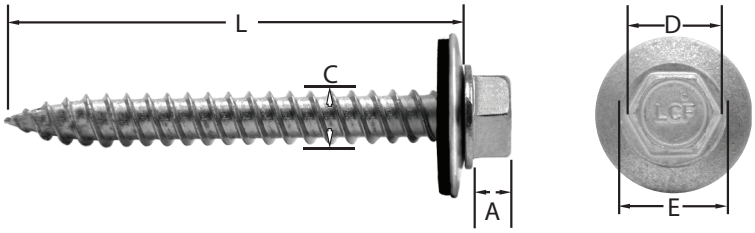
"Lakeside Construction Fasteners Providing Alternative Fastener Solutions!"™

300 MASTERGRIP™ STAINLESS™

Fastener Dia.: #14
Head Size: 3/8 HWH
Threads: Twin-Lead
Innovation: Weather Tight Seal
Material: 300 Stainless Steel
Washer: Stainless Steel EPDM
Lengths: 1", 1 ½", 2", 3", 4", 6"
Application: Replacement Screw / Snow Retention



Part #	L	A	C	D	E
S1410250EW4300	1"	.155	.254	.305	.400
S1415250EW4300	1 1/2"	.155	.254	.305	.400
S1420250EW4300	2"	.155	.254	.305	.400
S1430250EW4300	3"	.155	.254	.305	.400
S1440BCEW4300	4"	.155	.254	.305	.400
S1460BCEW4300	6"	.155	.254	.305	.400

Standard Options:

Wet Paint

Lakeside Packaging 250 PIECES

Customized Options:

Powder Coat

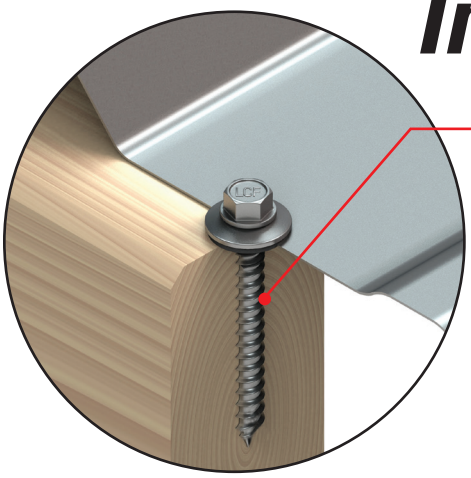
Lakeside Packaging 100 PIECES

PULLOUT TEST VALUES

PLYWOOD			OSB	SOUTHERN PINE	
1/2"	5/8"	3/4"	7/16"	1"	1-1/2"
425	700	900	350	825	1200

Fastener Type	Torsional	Shear	Tensile
300 MASTERGRIP™	125 in lbs.	3000 lbs.	4500 lbs.

Industry Fastener Leader!



300 MASTERGRIP™ engineered thread design allows the fastener to penetrate the metal panel quickly while locking into building substrates (Pine; OSB; Plywood; etc.) to resist fastener-metal panel pull-out in high wind and snow load environments. The **300 MASTERGRIP™** fastener will strengthen the building system securing the metal panel or snow retention device to the building roof structure.
